PROFESSIONAL EXPERIENCE

MWORK LLC

IT Administrator / Sales Operations Specialist | September 2023 – June 2026

- Administered IT support for **20+ remote sales representatives**, maintaining dependable access to business systems and minimizing disruption to daily sales activities.
- Provisioned user accounts, permissions, and onboarding access, enabling employees to connect to required systems and begin productive work.
- Managed company email and VoIP administration, resolving access and configuration issues to sustain reliable internal and customer communications.
- Diagnosed and resolved hardware, software, connectivity, and remote-work issues, restoring users to productive work and reducing operational interruptions.
- Delivered daily and month-to-date sales reports, giving leadership timely visibility into sales activity, performance, and outstanding follow-ups.
- Validated CRM records, customer information, contracts, and confidential documentation, strengthening data consistency and supporting dependable operational reporting.
- Streamlined appointment coordination and service follow-ups by maintaining current customer information, pending actions, and next steps, improving visibility across sales activities.
- Prepared management reports, correspondence, meeting materials, and operational documents, enabling the Sales Manager to access organized information for daily decision-making.
- Implemented structured follow-up tracking for sales and operational requests, keeping priorities and outstanding actions visible to the appropriate stakeholders.
- Coordinated technical and operational issues across sales personnel and internal stakeholders, accelerating issue ownership and maintaining continuity across remote operations.

TELETECH (TTEC)

Customer Support Representative / Technical Support | November 2018 – August 2023

- Resolved customer issues involving hardware, software, connectivity, accounts, billing, products, and sales, helping customers restore service and continue using required products or services.
- Diagnosed technical and service problems through structured troubleshooting, improving consistency in issue identification and resolution.
- Guided customers through technical solutions using clear, step-by-step instructions, supporting effective resolution while maintaining a professional customer experience.
- Documented customer interactions, troubleshooting steps, resolutions, and follow-up requirements in CRM systems, preserving complete case history and improving continuity between interactions.
- Verified customer information before completing case documentation, strengthening CRM data quality and reducing the risk of inaccurate account records.

- De-escalated complex customer concerns through issue ownership, clear explanations, and structured troubleshooting, helping move difficult cases toward resolution.
- Escalated cases requiring additional support to the appropriate cross-functional teams while preserving troubleshooting context, enabling more efficient handoffs.
- Managed customer and technical support activities within established service-level expectations, balancing resolution quality, documentation accuracy, and customer experience.
